3. Select your cloud region, then click "Get My Site"

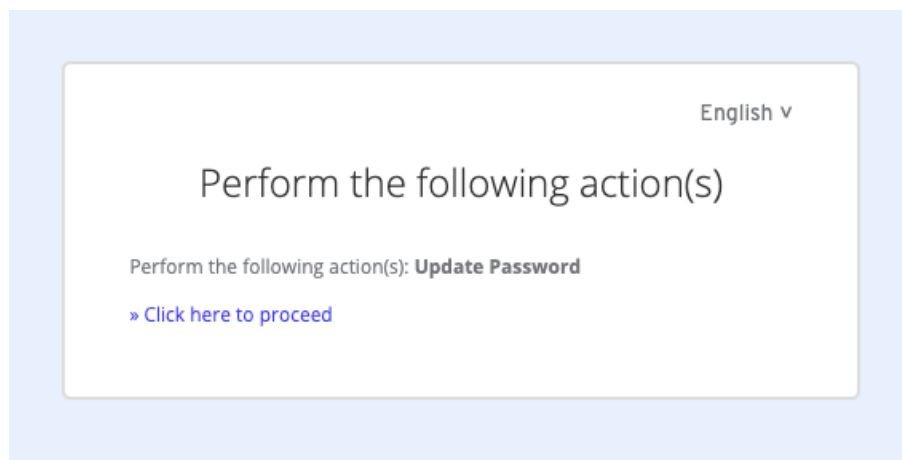

The screenshot shows a light blue dialog box titled "Select your Cloud Region". Below the title, it asks, "One last thing! In which cloud region would you like your Community Edition Process Mining site hosted?". There are four radio button options: "United States" (which is selected), "India", "Germany", and "Australia". At the bottom of the dialog is a blue button labeled "Get my site".

4. Now check your inbox for an email from Appian. This email will contain information to log into your new site.
 - a. If you don't see the email in your inbox, be sure to check your spam folder
5. Click on the set password link in the email to open your site
 - a. Your site link will not work until you have updated your password

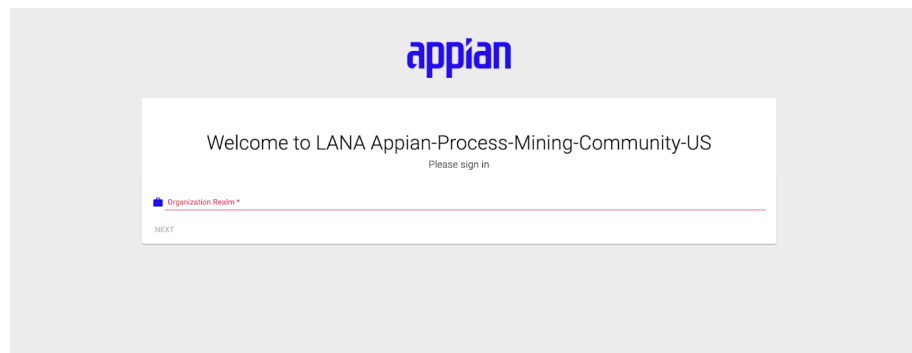

To set a password, navigate to [Link to account update](#)

6. Now follow on screen instructions to create a new password for your site

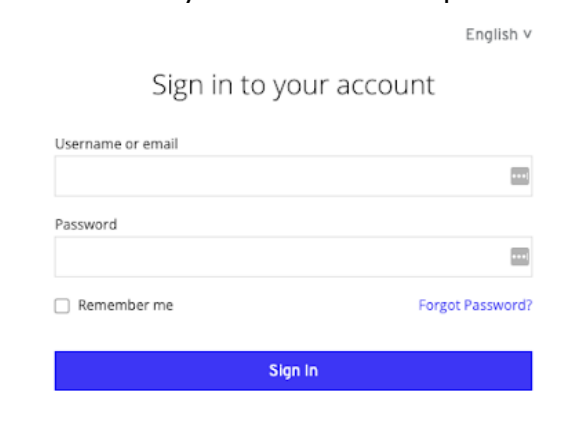

The screenshot shows a light blue background with a white rounded rectangle in the center. In the top right corner of the white box, it says "English v". The main heading in the center is "Perform the following action(s)". Below this, it says "Perform the following action(s): **Update Password**". At the bottom of the white box, there is a blue link that says "» Click here to proceed".

7. Once you have submitted your password, you will be prompted to enter your Organization Realm, which you can find listed in the original email under Realm Name

8. Next, sign in to your account with your username and password that you just created.

The image shows a screenshot of the Appian sign-in form. At the top right, there is a language selector "English v". The main heading is "Sign in to your account". Below the heading, there are two input fields: "Username or email" and "Password". Each field has a small icon to its right. Below the "Password" field, there is a checkbox labeled "Remember me" and a link "Forgot Password?". At the bottom, there is a blue button labeled "Sign in".

9. Your Process Mining environment comes without data. Be sure to download the sample log files from this course. Follow the instructions in the course to complete the hands-on exercises
