

Installation Instructions

Task Capture

Please follow the steps presented below in order to install Task Capture:

1. **Download Task Capture** using one of the installers below. For more information on the differences between MSI and exe, please review [this](#) helpful documentation.
 - [EXE & 32 bits](#)
 - [MSI & 32 bits](#)
 - It is NOT supported to have both the .exe and .msi versions of Task Capture on the same machine.
 - If you have already installed the TaskCapture.exe for previous versions we highly recommend you continue using the .exe installer version for the next releases.
 - The functionality of both installer types is the same.

2. Installation

To install **Task Capture**, run the chosen file. You will be prompted to accept the license agreement.

3. **Activate Task Capture.** There a couple of ways to do this, all of them are listed [here](#).

One option is to use the activation key indicated on the License Certificate
For Offline activation, please follow the steps as described [here](#)

4. Start documenting

Click the "New Document" button on the Start page to create new process documentation.

Then select one of the options available:

- "Build Diagram" - if you want to manually create your process map first and then capture each business step
- "Capture Process" - if you want to capture your process step by step and let the application build process map automatically

5. Edit

Easily edit each step of your process document using an intuitive panel

6. Export

You can create a Process Definition Document (PDD) or UiPath Studio (XAML) file from Task Capture recordings

If you encounter any difficulties, please contact us by submitting a ticket [here](#)
